**In memory of Geraldine King (1953-2009)
whose work on the inscriptions of ancient North Arabia
helped make the creation of OCIANA possible**

Geraldine Margaret Harmsworth King was an excellent scholar who played an important part in deepening our understanding of the Ancient North Arabian inscriptions and providing a much sounder basis for their study. She undertook a number of expeditions to the deserts of Jordan and Syria, and the mountains of Dhofar, recording thousands of inscriptions, which she then worked on patiently and perceptively over many years.

In 1986 and 1987, she single-handedly recorded over 1500 Hismaic inscriptions in the south of Jordan. She produced an edition of most of these in her doctoral thesis, completed in 1990, in which she undertook the first detailed analysis of every aspect of this type of Ancient North Arabian inscription. Although she never published her thesis, it quickly became, and has remained, the standard reference work on the subject. A retyped version of Geraldine's thesis is available on the website *Ancient Arabia: Languages and Cultures* (<http://www.ancientarabia.co.uk/>)

Between January and March 1989, Geraldine and her colleague Becca Montague spent six weeks in the basalt desert of north-eastern Jordan in freezing temperatures recording inscriptions and sites which were about to be destroyed by bull-dozers clearing a network of tracks for huge machines searching for oil-bearing rocks. Geraldine recorded over 3,300 inscriptions and a huge number of rock-drawings, and Becca recorded over 400 sites. Geraldine had almost finished preparing the inscriptions for publication when she died, and they are included in OCIANA under the siglum KRS "King Rescue Survey").

In the 1980s and early 1990s, 'Alī Aḥmad Al-Mahāsh Al-Shāḥrī discovered hundreds of painted and carved texts in the mountains of Dhofar, in a previously unknown form of the South Semitic script. He asked Geraldine to mount an expedition with him to record these and in 1991 and 1992 they recorded some 900. Geraldine wrote a very full report and even designed a font to represent the letters of the inscriptions in order to prepare a concordance, a prerequisite for any decipherment. This can be downloaded from the website mentioned above.

In 1995 and 1996 she joined the first two seasons of the Safaitic Epigraphic Survey Programme which recorded over 4000 Safaitic inscriptions in southern Syria. She also worked for many years on the Safaitic Database, on which OCIANA was founded.

Geraldine was not only an excellent scholar and an indefatigable field-worker, but a warm, loyal, generous, and affectionate friend. She could always be relied on in any circumstances, however gruelling, and showed great courage and endurance when required. But she was also gentle and funny and very kind. She will be fondly remembered by all who were lucky enough to come into contact with her.¹

Acknowledgements

The completion of OCIANA's Second Phase would not have been possible without the collaboration and active involvement of many people and institutions. Firstly, we are deeply indebted to the two institutions which provided the basis on which this Phase of OCIANA was founded and without which it could not have taken place: the United Kingdom's Arts and Humanities Research Council, which awarded the project a generous grant for three and half years from September 2013, and the Khalili Research Centre, University of Oxford, which provided working space, facilities, and administrative resources for the Project over this period. We are immensely grateful to both these institutions.

We would like to thank Professor Jeremy Johns, director of the Khalili Research Centre and administrative director of OCIANA, without whom it would have been impossible to undertake both the first and second phases of the Project. Indeed, it was his idea to create a project to convert Michael Macdonald's *Safaitic Database*, of some 15,000 Safaitic inscriptions, into the OCIANA with over 40,000 inscriptions in all the Ancient North Arabian scripts, and to publish the thousands of inscriptions which Geraldine King had prepared for publication before her untimely death. Considering that his own fields are far removed from pre-Islamic epigraphy, this was extremely generous and OCIANA and those who use it owe him a great debt.

Daniel Burt, who is in charge of IT at the Khalili Research Centre, set up the web sites of the First Phase and developed the OCIANA database in the Second Phase. He worked incredibly hard, and with remarkable patience and good humour, to meet the incessant needs of the epigraphists who were entering the data. The database he developed, where for each of more than 40,000 inscriptions the user will find the reading and translation of the text, plus the *apparatus criticus*, commentary, all available information, references, and images on a single page, is something for which we are immensely grateful.

We are also most grateful to Jennifer Brooke Lockie who scanned, and supervised the scanning, of over 100,000 black-and-white negatives, colour slides and prints from a number of collections, so that they could be inserted into the OCIANA database.

The work on OCIANA has been greatly enriched by frequent discussions with Dr Ahmad Al-Jallad and his doctoral students at the University of Leiden, The Netherlands. They have often suggested interesting and very plausible interpretations of unusual or unique expressions in the inscriptions; and their research, which they have generously shared with the OCIANA team, has been of great value to the project.

The inclusion of so many inscriptions and photographs would not have been possible without the generous collaboration of scholars and institutions throughout the world. These have given permission for their published inscriptions to be entered in OCIANA, and have often provided the project with photographs not included in their publications, or have sent us photographs of previously unpublished inscriptions for inclusion. In the case of the smaller collections these are:

Professor Dr N.T.W. Bader

To all these we express our deep gratitude.

Introduction

Dispersed Oasis North Arabian inscriptions

In an article published in 2000, Michael Macdonald drew attention to the fact that it is often very difficult to identify as Taymanitic, Dadanitic, or even Dumaitic the short texts in Ancient North Arabian scripts on objects found in Mesopotamia, Syria and elsewhere from the 8th–6th centuries BC.² He suggested that in its earliest phases the Ancient North Arabian script used in the oases of north Arabia was relatively uniform and only gradually developed differently in each place. The script(s) on these objects had previously been known by the highly misleading misnomers "Old Arabic" and "Chaldaean",³ and so Macdonald suggested that it would be more appropriate to call them "Dispersed Oasis North Arabian".

Dumaitic

At present, this category consists of only three graffiti found by F.V. Winnett and W.L. Reed near Sakākah.⁴ Winnett labelled them "Jawfian" but Macdonald suggested that the ancient name, Dūmah, would provide a better name and so called them "Dumaitic".⁵ It is appropriate that WDum 3 is a prayer to *Rdw, Nhy*, and *'trs'm* ('Atarsamain) three of the deities whose images were removed from Dūmah by the Assyrian king Senacherib.

Greek

The 30 Greek graffiti included here were mostly connected with Safaitic texts either (a) as part of a Safaitic-Greek bilingual (for example WR.D 1), or (b) because they contain the genealogy and/or lineage affiliation of persons known from Safaitic inscriptions (for example WR.C 4), or (c) because they were found in amongst Safaitic graffiti (for example BRenv.A 4). The majority were found by the Safaitic Epigraphic Survey Programme between 1995 and 2002. They have not all been read yet.

Gulf Aramaic

Gulf Aramaic refers to the script which developed from Imperial (Official) Aramaic in the region of the Persian Gulf during the Hellenistic period. The single text in this script which is included here is the Aramaic part of an Aramaic-Hasaitic bilingual grave inscription, Mleiha F5 Aram, which was discovered in Sharjah 2015.⁶

Hasaitic

The term "Hasaitic" is used to describe inscriptions carved in the Ancient South Arabian script which are found in the north-east and central areas of the Arabian coast of the Persian Gulf. The majority of them are tomb stones and the very limited linguistic information they provide makes it difficult to be sure what language they were carved in. There are a number of personal names formed with the divine name *hn-'lt*, but of course the etymological language of personal names is not a clue to the language their bearers spoke.⁷ There are a few possible examples of Aramaic influence, and the use of *d' l* to indicate affiliation to a lineage group is typically Ancient North Arabian. Apart from these tantalizing hints, we need many more — and more informative — inscriptions before a proper analysis of the language can be undertaken.

Latin

Two Latin graffiti are included here. One is HCH 173 which was found on the Cairn of Hani', a cairn in north-eastern Jordan with 172 Safaitic inscriptions. The Latin text does not mention the person buried under the cairn, as 99 of the Safaitic inscriptions do, and it is not clear how it got there. The second Latin text is a graffito at the site of al-Namārah in southern Syria. This had a small Roman military garrison and fort and although the graffiti by the soldiers are in Greek, the Latin graffito gives the name of the Third Legion Cyrenaica.

2 See Macdonald 2009, III: 33.

3 For "Old Arabic" see Burrows 1927, and for "Chaldaean" see Albright 1952.

4 They are WDum 1–3.

5 For "Jawfian" see Winnett & Reed 1970: 69, 73, 80–81; for "Dumaitic" see Macdonald 2009, III: 29, 33, 65 note 31.

6 See Overlaet, Macdonald & Stein 2016.

7 See Macdonald 2009, III: 38.

Minaic

The 9 "Minaic" inscriptions included here were all recorded at al-'Ulā, ancient Dadan, and published as Dadanic. Six of them are known only from hand copies and some, such as JSLih 220 and 364, seem to have a mixture of Minaic and Dadanic letter forms.

Mixed Safaitic/Hismaic

There are 46 of these texts which seem to have some Safaitic and some Hismaic features. They were identified as "Mixed Safaitic/Hismaic" by Geraldine King (1990: Appendix 2).

Nabataean

Three of the 4 Nabataean inscriptions here are the Nabataean parts of Hismaic-Nabataean bilinguals. The fourth was found in amongst Hismaic inscriptions.

Palmyrene

The one Palmyrene graffito here (SS 2) has the same names as a Safaitic graffito (SS 3) on the same relief.

Queries

These are two graffiti where we have been unable to identify the script.

OCIANA

After the tragically early death of Geraldine King in 2009, Professor Jeremy Johns suggested to Michael Macdonald the idea of creating a website on which her work could be published, since much of it was almost complete when she died. This led to the creation in 2011 of the *Ancient Arabia: Languages and Cultures* (AALC) website (<http://www.ancientarabia.co.uk/>) which was based at the Khalili Research Centre (KRC) of which Jeremy Johns is the director. AALC was set up by Daniel Burt, the KRC's IT specialist, and was funded by a grant from the University of Oxford's John Fell Research Fund.

At the same time, Jeremy Johns and Michael Macdonald started planning to create OCIANA based on the Safaitic Database which Michael Macdonald had started in 1994 and which by this time included some 15,000 Safaitic inscriptions. With a generous grant from the United Kingdom's Arts and Humanities Research Council and again based at the Khalili Research Centre, the project started to create a new database which aimed to include all the known inscriptions from ancient North Arabia in the broadest sense. In this, it was complementary to the *Digital Archive for the Study of Pre-Islamic Inscriptions* (DASI), based at Pisa, which was creating a corpus of the Ancient South Arabian inscriptions. In Phase 1 of OCIANA, in 2012, the website (<http://krc.orient.ox.ac.uk/ociana>) was created together with an initial database containing the 3372 Safaitic inscriptions recorded by Geraldine King in 1989 on the Basalt Desert Rescue Survey (BDRS).

OCIANA Phase 2 was a three-and-a-half year project, which ran from September 2013 to March 2017 and was funded by the United Kingdom's Arts and Humanities Research Council, to whom we are extremely grateful. The OCIANA Phase 2 team consisted of:

- Dr Ali Al-Manaser, who was in charge of discovering and entering collections of Safaitic inscriptions, by far the largest corpus of Ancient North Arabian inscriptions, as well as portions of the Hismaic corpus;
- Dr María del Carmen Hildago-Chacón Diez, who was in charge of entering the Dadanic, Taymanitic, Dispersed Oasis Ancient North Arabian, Hasaitic, and Hismaic inscriptions;
- Daniel Burt, as IT expert and developer of the OCIANA database;
- Jennifer Brooke Lockie, who was in charge of scanning of over 100,000 black-and-white negatives, prints and colour slides so that these could be entered into the database;
- Michael Macdonald was the academic director and
- Professor Jeremy Johns was the Administrative director.

Daniel Burt created a new database into which were transferred the approximately 15,000 Safaitic inscriptions from Michael Macdonald's *Safaitic Database* and Geraldine King's BDRS texts. These were all checked and tagged, commentaries and *apparatus criticus*, and bibliography were added, as well as all available information about the provenance of the texts. Whenever possible, photographs or images of hand copies were entered for each inscription. Many thousands of published and previously unpublished inscriptions were added, so that after three and a half years the number of inscriptions in OCIANA has risen to over 40,000. The tagging functionality built into the OCIANA database has allowed the project team to generate comprehensive word lists, onomastic indices, and concordances of genealogies, as well as to output the inscriptions as web pages, digital publications such as this one, and XML and JSON files for use by future scholars in the field.

To take just one example of how we hope that OCIANA has made the Ancient North Arabian inscriptions more accessible to epigraphists, scholars in other fields, and the general public. Part 5 of the *Corpus Inscriptionum Semiticarum* published in 1950–1951, collected almost all the Safaitic inscriptions known at the time (some 5380).⁸ They are transliterated in an adaptation of the Hebrew script, and the translations and commentary are in Latin, with a rather complicated process needed to access the hand copies on which the readings were based. In OCIANA, all these inscriptions are available, transliterated into the roman script and formalized Safaitic glyphs, with translation, *apparatus criticus*, commentary and all other information in English, and with the image of the inscription on the same page. In addition, thanks to the Safaitic Epigraphic Survey Programme (1995–2003), which searched for the sites where the *Corpus* inscriptions had been found and photographed them, OCIANA can, for the first time, provide photographs of many of the inscriptions which up till now were known only from hand copies of variable accuracy. Similarly, OCIANA provides photographs of Dadanitic, Taymanitic and Hismaic inscriptions, which were previously known only from hand copies.

The one group of Ancient North Arabian inscriptions not included in Phase 2 of OCIANA was the Thamudic B, C, and D and Southern Thamudic (or "Himaitic", as they are now called).⁹ These will be added in Phase 3 of the project, which will be based at the University of Leiden, The Netherlands, under the joint academic direction of Dr Ahmad Al-Jallad and Michael Macdonald.

It should be noted that we have called this the "Preliminary Edition" because we are aware that it is far from perfect. There are some collections of inscriptions which are the subject of ongoing PhD dissertations, which will need to be added in Phase 3, once the dissertations have been submitted. There will also, inevitably, be cases in such a huge collection, where some inscriptions may inadvertently have been omitted, and there will certainly be some texts where the readings, translations, or information about an inscription can be improved. This, plus the fact that English was not the mother-tongue of all the researchers working on OCIANA, may mean that occasionally there will be mistakes or infelicities in the translations, commentaries, etc. We hope the user will forgive these and bring them to our attention (ociana@orinst.ox.ac.uk) so that we can correct them. Once we have been able to take account of all these factors, we hope to publish a corrected First Edition during Phase 3.

⁸ The only major collection it did not include, were the majority of the inscriptions in Littmann 1943.

⁹ See Robin & Gorea 2016.

General Notes

1. As mentioned above, one of the principles on which OCIANA was founded was that it should convert collections of inscriptions which had been published in numerous different languages, into a single, coherent corpus presented in a single international language, English. Thus, all quotations in languages other than English have been translated into English and the transliterations of Ancient North Arabian or Arabic words have been converted to the systems used in OCIANA (see below).
2. When an inscription number was originally published as, for instance WH 1725a, it has been converted to WH 1725.1.
3. The term "ed. pr." (*editio princeps*) in the "Origin of reading" and/or "Origin of translation" refers to the work indicated by the siglum.
4. If two or more numbers from the same work, e.g. "C 257, C 1365" appear in the Siglum field, this means that two parts of the same inscription were published as two or more texts in the edition.
1. If one number in an edition occurs in the Siglum field and another from the same edition in brackets after it, for instance, "LP 285 (LP 1096)", this means that the same inscription was published twice, under two different numbers, in the original edition.
5. If we have not been able to interpret a sequence of letters in the original, they are placed in italics at the appropriate point in the Translation.
2. Those who wish to cite readings etc. in OCIANA can either do so as "OCIANA" + the script (e.g. "Hasaitic") + the siglum and the date the pdf or database was consulted, or by citing the link which will be found at the end of each inscription + the date it was consulted.

Michael C. A. Macdonald
March 2017

Editorial apparatus used in the OCIANA edition of all inscriptions:

- { } In the **Transliteration** field: Each letter the reading of which is uncertain is enclosed between { }. If a succession of letters in the same name or word is doubtful, **each** is placed between { }.
- () In the **Transliteration** field: When an inscription is known only from a hand-copy, editorial corrections of the **copy** are placed between (). If a succession of letters in the same name or word has been corrected, **each** is placed between ().
- () Round brackets with nothing between them (not even a space) signal editorial excision of a sign in the **copy**.
- [] Restored letters are placed between []. These brackets are used by the editor:
 - 1- if he/she thinks the copyist has missed a letter;
 - 2- if he/she thinks the author of the inscription has missed a letter;
 - 3- if a letter has been destroyed on the stone but can be restored from the context.If a succession of letters in the same name or word has been restored, **each** is placed between [].
- [] brackets with nothing between them (not even a space) signal that the editor believes a letter has been omitted but will not speculate as to what that letter was.
Note that if a letter in the Transliteration field is enclosed in any of these brackets, the **translation of the entire name or word in which it occurs is enclosed in { }**.
- < > Signal editorial corrections of the original text. If the editor believes that the author of the inscription wrote an incorrect letter, he will place the corrected letter he proposes between < >. Example: *rw* in the Transliteration field would mean that a letter other than *b* appeared at this point in the original text and has been corrected to *b* by the editor.
- << >> Signal editorial excision of a redundant letter in the original text (e.g. *mdgbr* would appear as *md<<>>br*).
- [[]] For corrections or erasures by the author.
Corrections: When the author of an inscription carved an incorrect sign or signs and then transformed it/them into the correct one(s), the transliteration of each **corrected** sign is placed between [[]] in the Transliteration field.
Erasures: If the author of an inscription carved an incorrect sign or signs and then erased it/them, "[[]]" (with no space between them) is placed in the Transliteration field at the point where each erased letter or letters occurs.
- { {{ }} } If a letter has been altered (e.g. by vandalism) so as to obscure the sense of the text or to produce nonsense, the transliteration of the original letter (if ascertainable) is placed between {{ }} in the Transliteration Field and a note made in the Commentary. If the original letter has been rendered unrecognizable, {{ }} with no space between them is placed in the Transliteration Field.
- A series of four hyphens is used to signal one or more unreadable letters in the inscription, or areas where the text has been broken off.
- [---] Signals that the original text is incomplete at this point, for whatever reason.
- (---) Signals that **on the copy** the text appears to be incomplete at this point.
- (---)---- Signals that an apparent gap in the copy is followed by one or more unreadable letters.
When a passage in the original cannot be translated, the transliteration of the passage is placed *in italics* at the appropriate point in the Translation.

Distinguishing words with identical spellings

Because of the search requirements in the database, enclitic particles and pronouns appear in the Transliteration field with a hyphen and a space. Thus, *b-h-dr* ("in this place"), *'b-h* ("his father").

In order to distinguish words which have an identical spelling in these inscriptions, the following conventions have been adopted in the Transliteration.

- '-* the definite article which sometimes occurs instead of *h-/hn-* (see Al-Jallad 2015: 16–17)
- 'l* the noun "lineage"
- 'l-* the preposition (compare Arabic *ilā*)
- b* the Taymanitic for "son (of)"
- b-* the preposition "with", "in", etc.
- bn* "son of"
- bn-* the preposition (compare Arabic *bayna*)
- bn* represents the personal name Bn in the Transliteration field (to distinguish it from *bn* ="son of"). However, it will appear as Bn (that is without the dot) in the Translation field
- bt* "daughter of" in Taymanitic and occasionally in Safaitic and Hismaic.
- bt* represents the personal name Bt in the Transliteration field (to distinguish it from *bt* ="daughter of"). However, it will appear as Bt (that is without the dot) in the Translation field
- bt* the noun "house, tent"
- d* the relative pronoun
- d-* the relative pronoun in *d-* *'l* only
- 'l* the noun "colt, young male horse"
- 'l-* the preposition (compare Arabic *'alā*)
- 'm* the nouns "grandfather", "year", or "people"
- 'm-* the preposition "with"
- 'n* the nouns "help", "a spring"
- 'n-* the preposition
- f* the conjunction
- f-* the preposition "in" (compare Arabic *fī*)
- k-* the preposition "like"
- k* the 2nd person singular enclitic pronoun
- l* the *lām auctoris* introducing a text
- l-* the preposition
- m* the relative pronoun (= *man with assimilation of the [n])
- m-* the preposition (= *min with assimilation of the [n])
- mn* the relative pronoun

<i>mn-</i>	the preposition
<i>-n</i>	the 1st person singular or plural enclitic pronoun on verbs and the 1st person plural enclitic pronoun on nouns
<i>h</i>	the vocative particle
<i>h-</i>	the definite article
<i>-h</i>	the 3rd person singular enclitic pronoun
<i>-hm</i>	the 3rd person plural enclitic pronoun

Transliteration of Arabic

The structure of inscription records in the Collections

Individual inscription records within the corpus are listed here with all of the information that is contained within the database with regards to their content and provenance, alongside any *apparatus criticus* or commentary notes that may relate to them. Each individual record also contains a hyperlink to the webpage for that inscription, which will contain any photographs or tracings that the database holds for them.

Each inscription record is structured as follows:

- 1. Main identifying Siglum, followed by any alternative Sigla (in brackets)**
- 2. Transliterated text of the inscription**
- 3. Translation of the inscription**
- 4. Apparatus Criticus**
- 5. Commentary**
- 6. Provenance**
The site, region, and country from which the inscription originates
[Decimal Latitude and Longitude co-ordinates of the inscription's location]
- 7. References**
- 8. URL**
A hyperlink to the webpage for this record from the OCIANA database

It is important to note that, where the database does not contain relevant information or content, that section will not be shown. So, for example, not every entry will include a section for Apparatus Criticus, Latitudinal and Longitudinal co-ordinates, and so on.

In order to keep the pdf versions of the Corpus to a manageable size, images of the inscriptions have not been included alongside the records, but the URL for each inscription record will link the user to a webpage that includes all of the images OCIANA has for each inscription.

Dispersed Oasis North Arabian

Cylinder seal Erlenmeyer (Garbini 1976: 170-171)

yf^f b rygr

Yf son of Rygr

Apparatus Criticus:

TEXT

Garbini: *y----*^c *br ygr* rather than *yf^f br ygr*.

DISCUSSION

Erlenmeyer & Erlenmeyer 1965: 14–16.

Commentary:

Broken cylinder seal, now 28 x 16 mm; material not reported (Sass 1991: 46).

Provenance:

Unspecified site, unspecified region, unspecified country.
Allegedly from Luristan (Sass 1991: 46).

References:

Jar from Tell al-Hulayfa (Boneschi 1961: 213-223; Boneschi 1968: 209-214)

l- bhy

By Bhy

Apparatus Criticus:

TEXT

Boneschi: *s¹l hd* rather than *l- bhy*.

DISCUSSION

Glueck 1938: 16–17.
Ryckmans 1939.
Sass 1991: 35–36.

Commentary:

Jar, 59 cm. high, with an inscription incised on the shoulder after firing (Sass 1991: 35). The letter *l* is incised above the letter *b* and the letter *h* above the letter *y*. The jar is from the late eighth century and it was considered as proto-Dedanite by Albright (1952: 44).

Provenance:

Tall al-Khulayfah, unspecified region, unspecified country.
Found in Glueck's excavations in 1938 in Room 40 (Sass 1991: 35).

Jar-Pithos from Ḥaġar Bin Ḥumeid (van Beek 1956: 7-9; Boneschi 1958)

khlm

Khlm

Apparatus Criticus:

TEXT

Boneschi: *bhm* rather than *khlm*

DISCUSSION

Albright 1956: 9-10.

Commentary:

Pithos, about 60 cm high and with a rim diameter of 36.5 cm., with a monogram in relief (Sass 1991: 33). A possible date of the monogram is the ninth century B.C. (see van den Beek 1956: 9).

Provenance:

Ḥaġar bin Ḥumayd, unspecified region, unspecified country.

Found in the excavations of the American Expedition in the 1950-51 season, field no. 3019 (Sass 1991: 33)

References:

Dumaitic

WDum 1 (WTI 21)

h ŗdw s¹l̨t klb bz

O Ŗdw the petition of Klb is here

Commentary:

Winnett identified the script of three inscriptions from near Sakākah as "Jawfian" (Winnett & Reed 1970: 69, 80) which Macdonald suggested would be better labelled "Dumaitic" (2000: 33). However, given that only three graffiti in this script have been found, and that the only differences between Dumaitic and Taymanitic lie in the shape of a possible *d* (WDum 2) and *z* (WDum 1). The script of these three texts may therefore be Taymanitic with these three idiosyncratic letter shapes.

Provenance:

Sakākah, Ġawf, Saudi Arabia

WDum 3 (WTI 23)

h ŗdw w nhy w 'trs¹m s¹d -n ɻ- wdd -y

O Ŗdw and Nhy and 'trs¹m help me in the matter of my love

Commentary:

Winnett identified the script of three inscriptions from near Sakākah as "Jawfian" (Winnett & Reed 1970: 69, 80) which Macdonald suggested would be better labelled "Dumaitic" (2000: 33). However, given that only three graffiti in this script have been found, and that the only differences between Dumaitic and Taymanitic lie in the shape of *d* (WDum 1-3), a possible *d* (WDum 2) and *z* (WDum 1). The script of these

three texts may therefore be Taymanitic with these three idiosyncratic letter shapes. It should be noted that that the three deities here occur in the list of six deities which the Assyrian king Sennacherib took from Adumatu (Dūmah, mediaeval and modern Dūmat al-Ğandal) and which were returned by his son Esarhaddon. These were: Atarsamain (^da-tar-sa-ma-a-a-in = ^{tr}s²m here), Dāya (^dda-a-a), Nuḥāya (^dnū-ḥa-a-a = nh̄y here), Ruldāwu (^drū-ul-da-a-a-ú = r̄dw here), Abirillu (^da-bi-ri-il-lu), and Atarqurumâ (^da-tar-qu-ru-ma-a) "the gods of the Arabs" (DINGIR.MEŠ Ša LÚ.a-ri-bi). See Leichty 2011: 19. It should be noted that there is so far no mention of Dāya, Abirillu, and Atarqurumâ in the Ancient North Arabian inscriptions. This is one of the few occasions on which the 1st person singular enclitic pronoun on a noun (wwd-y) is shown in the otherwise severely consonantal Ancient North Arabian scripts. For others see Macdonald 2004: 506–507.

Provenance:

Sakakah, Čawf, Saudi Arabia

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035858.html

BRev.B 6

AOYAΔHA

'wd'l

Commentary:

BRev.B 5, 6 and 7 are on the same flat face of a block of basalt. It was split into several pieces, of which six survive, after BR.B 5 was inscribed (since the beginning of the text is missing and parts of the same letters are on different sections) but before 7 was written (since it is neatly confined to one section). The side of the block adjacent to the beginning of what remains of 5 is weathered smooth and is patinated to black, which suggests that the break must have taken place a long time ago. BRev 6 is carved in tiny letters along the edge of one section of the block. It is difficult to know whether it was carved before or after the block was broken up.

Provenance:

Unnamed, Al-Suwaydah, Syria

On the left bank of Wādī Shām, north-west of the water-tower at Bi'r al-Rusay'i. A small outcrop approximately 150 m north of the wadi. This is site E1 in Macdonald, Al Mu'azzin & Nehmé 1996.

References:

[BRev.B] Inscriptions recorded by the Safaitic Epigraphic Survey Programme in 1995 at a small outcrop approximately 150 m north of the left bank of Wādī al-Shām, north-west of the water-tower at Bi'r al-Rusay'i, and published here. Number: 6

ΕΠΙ Α(ΥΤΟΚΠΑΤΟΡΟC) Μ AYP ANTΩΝΕΙΝΟΥ ΚΟΚΩ -----

Under the Emperor M[arcus] Aur[elius] Antoninus -----

Commentary:

The inscription was left unfinished. Its present position over the door to a mediaeval mausoleum, built from the debris of the Roman fort, is secondary.

Provenance:

Al-Namārah "island", unspecified region, unspecified country.

Ḩarra east of the Ḥawrān. C places it among inscriptions from "Zalaf (about 10 km. south of Riğm Qa'qūl) near the 'Roman' road leading from al-Namāra to the Ruhba on the west side", i.e. ("Zalaf (i)"), but it is, of course, over the door to the mausoleum on Al-Namārah "island", where it was photographed by the Namārah Rescue Survey in 1996.

C 3579 bis (Wadd 2274; Dussaud & Macler 1901: no. 260; Al-Namārah.M 199)

ΦΛΑ[B]ΙΟC ΔΩCIΘEOC MAYNOC

{Flavius} Dōsitheos Maunos

Apparatus Criticus:

Note read in Dussaud & Macler 1901: no. 260, nor in C;

The reading is Waddington's.

Commentary:

Three names.

Provenance:

Al-Namārah (C p. 443), Rif Dimashq, Syria
[Latitude/Longitude: 32.88545 / 37.29163]

Al-Namārah itself is an "island" in a basin at the confluence of the Wādī al-Şawṭ and the Wādī al-Shām. The island rises to a considerable height above the wadi bed. On its top are the ruins of a Roman fort the outlines of which, and the square north-east and south-west towers, can still be made out. However, much of the masonry has been reused to build a mediaeval mausoleum, including a lintel with an unfinished Greek inscription mentioning Marcus Aurelius (Waddington 1870: no. 2264) and stone doors. There are many Safaitic, Greek and two Latin graffiti on the slopes of the island and the banks of the wadi. In antiquity, there were small dams, cisterns, wells and diversion channels to trap the water and to lead it to nearby fields, see Macdonald 2009.

Is.H 603

Commentary:

Greek

Provenance:

Al-‘Isāwī, Rif Dimašq, Syria

[Latitude/Longitude: 32.903569 / 37.320314]

Al-‘Isāwī is the name of a probably ancient well between two headlands on the eastern side of the Wādī Shām as it runs northwards from the modern Al-Namārah dam to the Ruhbah. The well is large, stone lined and with stone water-channels running from it. The main concentration of published inscriptions is on the top of the northern headland, but there also many inscriptions on its south-west slopes, coming down to the well and on the southern headland, on the crest of which is a stone tower.

SESP.U 24 (MISS.J 1)

ENOC ΛΟΒΑΙΑΘΟΥ

Hani' son of Lobay'at

Commentary:

Partial bilingual with SESP.U 23.

Provenance:

Unnamed, Al-Suweidah, Syria

At 21.3 km east of Rushayda and at 7.5 km west of Bi'r al-Ruṣay'ī, the Rushaydah-Zalaf road crosses a small tributary of Wādī al-Shām called by the local Bedouins Umm al-Ğathādir (its confluence with Wādī al-Shhām is 1.5 km to the north-east). SESP.U is 350 m north of the point at which the road crosses the tributary, on the right bank of the wadi which slopes steeply and is between 10 and 15 m high. This is site J in Macdonald, Al Mu'azzin & Nehmé 1996.

References:

WR.A 20

ΓΑΡΜΗΛ{O}{C} ΑΛ{Φ}Ω{C}{E} {O}YP{.}H----

Γαρμηλος Αλφωσε Ουρη----

Commentary:

See the commentary to WR.A 1. lightly scratched on the vertical surface of the rock. The first name is to the left of the beginning of 19 and the rest is between its first and second lines.

Provenance:

Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0036174.html

WR.C 2

ΜΑΙΑΝΗC

M'yn

Commentary:

WR.C 1-8 are on rock A, a large rock face overlooking Wādī Rushaydah just upstream of its confluence with a tributary. This text is near the top of rock A and is the first of three Greek inscriptions. Note that the *ēta* is of the "normal" monumental (H) type, unlike those in WR.C 3 and 4. On the name see Macdonald 2009: I, 77, n. 90.

Provenance:

Site 32.2. At the confluence of Wādī Rushaydah and an unnamed wadi, Al-Mafraq, Jordan

Some 8 km from the village of Rushaydah on the road to Zalaf. A cairn on the right bank of Wādī Rushayda, on a promontory at its confluence with another smaller wadi coming from the south-west. The promontory is littered with huge boulders and fallen pieces of the cliff. The highest point of the promontory is crowned with a cairn, itself surmounted by a small cylindrical tower of stones. At the foot of the cairn are 2 Bedouin tombs. Site 32.2 is approximately 20 m north of this tower. This is site I in Macdonald, Al Mu'azzin & Nehmé 1996.

References:

WR.C 4 (MISS.I 1)

CAAPOC XECEMANOY CAIΦHNOC ΦΥΛΗC XAYNHNΩΝ

S²a'ar son of Keḥs¹emān Daifite of the lineage of Kawn

Commentary:

WR.C 1-8 are on rock A, a large rock face overlooking Wādī Rushaydah just upstream of its confluence with a tributary. See Macdonald, Al Mu'azzin & Nehmé 1996: 480-484 for a commentary on this text and Macdonald forthcoming a for a longer commentary on the almost identical text Mg 1. Note that this is one of the few occasions on which we are able to vocalize names which are otherwise known only from the purely consonantal Safaitic orthography. Note that another Greek text (Mg 1) by the same author is on the same stone as a Safaitic text (Ms 29) by another member of the 'l Kn.

Provenance:

Site 32.2. At the confluence of Wādī Rushaydah and an unnamed wadi, Al-Mafraq, Jordan
Some 8 km from the village of Rushaydah on the road to Zalaf. A cairn on the right bank of Wādī Rushayda, on a promontory at its confluence with another smaller wadi coming from the south-west. The promontory is littered with huge boulders and fallen pieces of the cliff. The highest point of the promontory is crowned with a cairn, itself surmounted by a small cylindrical tower of stones. At the foot of the cairn are 2 Bedouin tombs. Site 32.2 is approximately 20 m north of this tower. This is site I in Macdonald, Al Mu'azzin & Nehmé 1996.

WR.D 1

MNHCΘH NACPIΑOC AΛOYΟY

May Naṣril son of ‘alū be remembered

Commentary:

WR.D 1 to 6 are on a cliff face, Face A, on the left bank of Wādī Rushaydah at its confluence with a tributary. This text is high up on the face and is carved in neat incised letters. Note the form of the *ēta*, without a right upper vertical, as in WR.C 2 and 3.

Provenance:

Unspecified site, unspecified region, unspecified country.

References:

[WR.D] Inscriptions recorded by the Safaitic Epigraphic Survey Programme in 1995 in Wādī Rushaydah, and published here. Number: 1

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035954.html

WR.D 3**Commentary:**

See the commentary to 1. This text is written in very lightly scratched letters starting well above WR.D 1 and continuing to the right of and below WR.D 2. It seems to consist of at least eight lines.

Provenance:

Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0036132.html

WR.D 11

ΔΙΟΜΗΔΗC

Diomēdēs

Commentary:

This text is at the base of the face and is incised. Note that this text has the normal “monumental” *ēta* (H) as in WR.C 2. The final letter looks more like a *lamda* than a *sigma*.

Provenance:

Unspecified site, unspecified region, unspecified country.

URL: http://krc.orient.ox.ac.uk/ociana/corpus/pages/OCIANA_0035955.html

Gulf Aramaic

Mleiha F5 Aram

$[d]\{ \}$ $np\check{s}$ ‘ mwd br gr
 $\{d\}y \{b\}n \check{l}-h$ br -h ‘ mwd br ‘ mwd
 šnt 20+20+20+20+10+{3}+{3}+{1}----

{This is} the memorial of ‘ mwd son of Gr
 {which} his son ‘ wd son of ‘ mwd {built} over him
 year 90 [or 97] ----

Commentary:

This inscription is carved on three sides of the raised "frame" around the Hasaitic version of the text. The script is similar to that of the bronze plaques published by Teixidor 1992 and Puech 1998. The third letter in line 2 appears to be a mistake for *b*, and the verbal form *bn* where one would expect *bn'/h*, are curious, see the discussion in Overlaet, Macdonald and Stein 2016: 134–135. On the date see the same work pp. 135, 138–139.

Provenance:

Mleiha, Sharjah, UAE, unspecified region, unspecified country.

References:

Overlaet, B., Macdonald, M.C.A. & Stein, P. An Aramaic–Hasaitic bilingual inscription from a monumental tomb at Mleiha, Sharjah, UAE. *Arabian Archaeology and Epigraphy* 27, 2016: 127–142.

Mleiha Tomb F5 Has

nfs¹/w-qbr/‘md/bn/
 gr/bn/ly/bqr/mlk/
 ‘mn/dy/bny/{}/{l} [-h]/br
 -h/‘md/bn/{}/{m}{d}/{}{b}{n}/{}gr/
 {b}{q}r/m----r/

Memorial and tomb of ‘md son of
 Gr son of ‘ly Investigator [?] of the king
 of ‘mn which built {over} {him} his son
 ‘md son of {‘md} {son of} Gr
 {Investigator of} [the king of ‘mn] ----

Commentary:

The inscription is carved on a large lime brick with a raised border on which is carved an Aramaic summary of the content of the inscription (see Mleiha Tomb F5 Aram) with a date of 90 or possibly 97, depending on whether the seven wavy lines following the four 20s and a 10 are units or simply decoration to fill the empty space. In Overlaet, Macdonald & Stein 2016 it is argued that the era is probably that of the Seleucids which would make the date 222/221 or 215/214 BC. For a full discussion of the inscription, including the meaning of the title *bqr*, see Overlaet, Macdonald & Stein 2016.

Provenance:

Mleiha/Al-Mulayhah, Sharja, UAE, unspecified region, unspecified country.
 [Latitude/Longitude: 25.3166 / 55.4979]

Robin 1994: 81: {'byd{ } for {'ydn; bnt 's²}{q}{ }w{s¹} b{f}---- for s¹nt/{s²}{r}{n} w- { }{r}b{ } ---
Ja 3231 (Jamme 1995: 180): line 2: 'ws¹ty for 'w{s¹}{ }{ }{d}y; lines 2–3: bdnt for {g}dnt; line 3: s²mtk{t}by for s²mtktby; line 4: bn{t} for s¹nt; 's²bw/rb[m]

TRANSLATION

Ja 3231 (Jamme 1995: 180): line 4: "daughter of 's²bw {one} quarter"
'Abbās 2009: 93: "Soul / and grave / 'Obaidin Bin / Aous / thi / bint Ghadanat / bin Chamtkutibi Year / Ten / and Forty".

Commentary:

The inscription was carved into the surface of a lime brick when it was still damp (see 'Abbās 2009: 92). The reading here is that published in Overlaet, Macdonald & Stein 2016: 136 and is based on the better photograph published in 'Abbās 2009: 91, Fig. 2. 'Abbās made the first correct reading of the name at the end of line 1 and the name in lines 2–3, as well as recognizing that line 4 contained a date.

Provenance:

SHI 05 (CIH 984b; Carruthers 1922: 322-324)

---- *qbr*
---- / *t lh*

---- grave
---- *t lh*

Apparatus Criticus:

TEXT

Line 3. CIH: ---- *t* ----.

TRANSLATION

Carruthers considered this inscription and SHI 6, as one text and translated: 'Cave and tomb of Shibām daughter of Luḥay son of W[ahb] whose wife [was] daughter of ----'.

Commentary:

Despite the apparent similarity of the stone and letter forms, SHI 06 (here) and SHI 05 cannot belong to the same inscription, as Carruthers supposed. The gap between the *w* in line 1 of SHI 06 and the *q* (in SHI 05) is too large and the *t* supposedly of "bnt" in line 2 of SHI 05 is separated from the *bn* (in SHI 06) by a word-divider.

Provenance:

Thāğ, Eastern Province, Saudi Arabia
[Latitude/Longitude: 26.8753 / 48.71751]

References:

SHI 06 (CIH 984a; Carruthers 1922: 322–324; Potts 1990, II: 76)

wgr/{w} {q}/{b}/{r}
 s²bm/b{n} ----
 y/bn/{'}----
 'n_tt {-h} ----
 bnt{/}----

Tombstone {and} {grave of}
 S²bm {son of} ----
 y son of {'}----
 {his} wife ----
 daughter of ----

Apparatus Criticus:

TEXT

Line 1. Sima: [q]/[b]/[r] at the end of this line.

Line 4. Sima: 'n_tt for 'n_tt {-h}.

TRANSLATION

Line 1. *wgr*: Carruthers: 'cave'; Potts: 'Monument'.
 Carruthers considers this inscription and SHI 5, as one text: 'Cave and tomb of Shībām daughter of Luḥay
 son of W[ahb] whose wife [was] daughter of ----'.

Sima confused CIH 984a and CIH 984b, which is why he made CIH 984b SHI 05 and CIH 984a SHI 06.

Commentary:

Despite the apparent similarity of the stone and letter forms, SHI 06 (here) and SHI 05 cannot belong to the same inscription, as Carruthers supposed. The gap between the *w* in line 1 of SHI 06 and the *q* (in SHI 05) is too large and the *t* supposedly of "bnt" in line 2 of SHI 05 is separated from the *bn* (in SHI 06) by a word-divider. We would assume that a verb has been lost stating that the *wgr* {w} {qbr} were made for S²bm by his wife.

 Line 2. Jamme: y whdb(?) bt[... rather than ----{ }y/w/bds¹/bt;

TRANSLATION

Line 2. *bt*, Jamme: 'daughter'.

Commentary:

A fragment of a Hasaitic inscription on a dressed limestone slab, reused, upside-down, in an inside wall of a house in the modern village of Ṭāḡ, see Dickson, V. 1971: 256–258, who describes it as "of a dark greenish colour, some eighteen inches [= 45 cms] long by ten inches [= 25 cms] wide, and placed about eighteen inches [= 45 cms] from the ground." It is possible that it was a practice piece for apprentice masons. The size of the letters varies considerably and the last letter in line 1 has a shape which is difficult to interpret.

Line 3. [d] l][t] l, Jamme: 'her of the clan of'; '(she) of the group of'; Sima: '(she) of the clan'.

DISCUSSION

Burkholder (1984: 206) commented: 'Found beside a dry well at Al-Hinnat, this stone had been reused in the well structure. Grooves cut by ropes are visible on the reserve side.'

The inscription is in the South Arabian script. It has been identified as part of a tombstone, but so few characters remain that translation is limited. The western and southern parts of the Arabian Peninsula have numerous such stones but their occurrence in the Eastern provide is rare'.

Wilkinson-Mulayha 1 (Ja 3230)

nfs¹ w- qbr dryt fty 'mlkn

Memorial and grave of Dryt servant of 'mlkn

Apparatus Criticus:

TEXT

Robin 1994: 80 reconstructs the text on the basis of Beeston's translation into Arabic and his statement that it is "undoubtedly South Arabian in every sense" (in Wilkinson 1977: 135, n. 6), as: *nfs¹ w- qbr dryt fty 'mlkn*. Ja 3230: *nfs¹ / w-qbr / dryt / 'bd 'mlkn*

TRANSLATION

Beeston in Wilkinson 1977: 135, n. 6: "gravestone and grave of Dariyyat servant of the kings (*nafs wa-qabir dariyyat fatā l-mulūk*)"

Robin 1994: 80: 'mlkn could be a personal name.

Ja 3230: "Tombstone and grave of Daryat servant of 'mlkn

Commentary:

Apparently carved on a brick, see Wilkinson 1977, n. 6 and Robin 1994: 80. The original has unfortunately been lost and no photograph was taken of it. Even Wilkinson's "transcription" (1977: 135, n. 6) does not seem to have survived. A.F.L. Beeston, to whom Wilkinson sent his transcription, replied with a translation into English and Arabic, but apparently did not give a transliteration. The original text has therefore been reconstructed on the basis of the Beeston's translation and his comment that the text is "undoubtedly South Arabian in every sense".

TEXT

Jaussen & Savignac consider the whole graffito as Dadanitic; Caskel (1954: 31, note 98) considers it as "Minaizing"; Jamme considers the two first lines as Dadanitic, and does not read the last line.

Line 3. Jaussen & Savignac: *ms¹mt* rather than *gs¹mt*.

DISCUSSION

Déroche 1987: 90.

Commentary:

The first two lines show a mixture of Minaic letter forms ('*h*, *z*, one *d*, *t*) and Dadanitic ones (the *d* which is second letter in each line, the *m* at the end of the first name), while the third line is Dadanitic.

Provenance:

Oasis of al-'Ulā, Al-Madīnah, Saudi Arabia

HH 1

I ḥyn bn ‘q{d}t d- 'l kmy w n{ṣ}b w dbḥ w ḥll w ḥṛṣ {s²y‘ -h ḏb'n f h lt w ds²r [s¹]l]m w qb{l}{l} {f} {h} {l}t {r}w[h] w {g}nmt

By ḥyn son of {‘qdt} of the tribe of Kmy and he erected [a cult stone] and sacrificed and returned to a profane condition and watched for his companions who had been raided, and so O Lt and Ds²r [grant] {security}, and {a reunion of loved ones} {and then} {O} {Lt} [grant] {relief} and {booty}

Commentary:

The third letter of the second name is probably a *d* of the type found occasionally in Hismaic where the stem is extremely short and the loop very large, see the script table in King 1990: 720 and the examples in KJA 26, KJB 79, KJC 241, etc. The only other typical Hismaic letter form is the *q* formed of two concentric circles, but this is also found in some Safaitic inscriptions. In the case of other letters, where there would be differences between their forms in Safaitic and Hismaic, *h d s²*, they have their Safaitic forms Hayajneh's interesting interpretation of the verb *ḥll* here as "to return to a profane condition" could be seen to be supported by Chelhod's interpretation of the *ḥaram/halāl* process in relation to sacrifice. He writes: "The very basis of sacrifice consists of liberating the dangerous element [derived from contact with the divine in a religious ceremony] and giving it back to the holy power, either by the shedding of blood — the liquid soul of the victim ... — or by total destruction as in the sacrifice of first-fruits.... Rather than considering sacrifice as a gift, it would be more exact in the majority of cases to think of it as a voluntary restitution [to the deity of the dangerous sacral element which the human had acquired while performing religious acts]" (1964: 57, and see pp. 50–57). However, it must be admitted that out of the 88 Safaitic inscriptions (so far) which contain the word *dbḥ* ("he sacrificed"), in only one other is the word immediately followed by *w hll* (SSWS 274: Genealogy *w dbḥ w hll f h lt s¹lm*). AWS 27 is the only other text in which *dbḥ* and *hll* occur together, but here they are a long way away from each other: Genealogy *w dbḥ w r'y f h lt w ds²r s¹lm w gnmt w hll w h lt 'wr mn 'wr h- s¹fr*. It thus seems to us, that while this is an interesting interpretation, the rapid changing of subjects which is typical of Safaitic inscriptions would make "and he camped" an equally plausible translation. The word *db'n* is a passive participle acting as an asyndetic relative clause or adnominal phrase, see Al-Jallad 2015: 189. For the interpretation of *qbll* see Al-Jallad 2015: 333.

WTI 42 (King 1990: 680)

l grm bn ġr {w} mṛṭ

By Grm son of Ġr; {and} he plucked out [his] hair

Commentary:

King (1990: 680) considers that the third letter from the end is a *d* rather than a *m*. In the copy can be read a *m* clearly. Since the text is mixed Safaitic/Hismaic and the personal name *mṛṭ* is common in Safaitic, we should reject King's reading. The Winnett & Reed's interpretation (1970: 85) comparing *mṛṭ* to the Arabic *marāṭa* "to pluck out hair" seems more plausible.

Palmyrene

SS 2 (Musée du Louvre AO 19801; PAT 2795)

*rp'l br twp'
zbdbl b- tb*

Rp'l son of Twp'
Zbdbl for good

Commentary:

The text is carved on a fine limestone relief showing the god Ba‘al-Šamīn in the centre with Aglibōl on his right and Malakbēl on the left. There are five Palmyrene graffiti (SS 1, 2, 4, 5, 7), one Greek (SS 6) and one Safaitic (SS 3). SS 2 is carved at the very top of the stone between Ba‘al-Šamīn and Malakbēl. For the bibliography on the relief and an excellent photograph see Dentzer-Feydy & Teixidor 1993: 144–145, no. 153 (but note that the transliteration of the Safaitic inscription, SS 3, contains a misprint in the second name). The first two names are also found in the Safaitic graffito (SS 3), in the form *rfl bn twfn*. The relationship between the two lines in SS 2 is not clear. Starcky (1949: 36, no. 2) inserts a [b][r] at the beginning of line 2, but there is no space for it on the stone and it seems unlikely that the author would have forgotten to carve it. It remains unexplained.

Provenance:

Said to have come from Wādī Miyah, not far from Bi'r Wereb, Palmyrene, Syria
Musée du Louvre bought the relief from a dealer in 1945.
